EQUIA Forte  
Bulk fill glass  
hybrid restorative  
system

## EQUIA Forte Bulk fill glass hybrid restorative system

1. Compression Fracture Resistance of Four Different Glass-Ionomer Cements. D. Glavina, K. Gorseta & T. Skrinjaric. Poster: ConsEuro 14-16 May 2015, London, UK.
2. Material-related recommendations for the use of glassionomer-based restorative system in class II cavities. A mechanical test. M. Basso, A. Ionescu & E. Brambilla. Boston 2015., poster ID: #3532.
3. Evaluation of hardness increase of GIC restorative surface in saliva. Y. Shimada, Y. Hokii, K. Yamamoto, S. Fukushima & T. Kumagai. Conseuro 2015, poster ID: #0054
4. Glass hybrid, but not calcium hydroxide, remineralized artificial residual caries lesions in vitro. A.Al-Abdi, S. Paris, F. Schwendicke. Clin Oral Invest. DOI 10.1007/s00784-016-1803-6 (published online April 2016)
5. Les ciments verres ionomères à haute viscosité. E. Dursun, E. Savard, J. Gelly & J.P. Attal. Clinic, 2016(37), pp. 293-297
6. Discussing the data. The Dentist, October 2016, pp. 94-96
7. In-vitro Study on Temperature Changes in the Pulp Chamber Due to Thermo-Curing of Glass Ionomer Cements. R. van Duinen, S. Shahid, R. Hill, D. Glavina. Acta stomatol Croat. 2016;50(4):287-291
8. Fracture resistance and cusp deflection of lined or non-lined composite and glass hybrid restorations over residual demineralized dentin. M. Sawalt, S. Paris, U. Blunck, F. Schwendicke. J Adhes Dent 2017; 19:77-82
9. Clinical Performance of a Glass Hybrid Restorative in Extended-size Class II Cavities After 1-year. S. Gurgan, Z. Kutuk, C. Ozturk, R. Soleimani, F. Yalcin Cakir. Abstract 0235, 2018 AADR/CADR Annual Meeting
10. Flexural Strength With Depth and Shrinkage Stress of Bulk-fill Composites. B. Mendonça, F. Rueggeberg, R. Braga, J. Soto, G. Ambrosano, E. Castro, V. Azevedo, M. Giannini. Abstract 682, 2018 AADR/CADR Annual Meeting
11. Fluoride Release From a New Amalgam Replacement Material. N. Cention, T. Bui, M. Heinz, R. Bergelin, M.T. Pulido, J. Mitchell. Abstract 1012, 2018 AADR/CADR Annual Meeting
12. Microhardness Comparison of Conventional Restorative Glass-Ionomer Cements. M.F. De Lima Navarro, R. Menezes-Silva, A.P. Magalhães, L. Bueno, A.F. Borges, S. Leal, Soraya, R. Pascotto, Renata. Abstract 1585, 2018 AADR/CADR Annual Meeting
13. Properties of New Glass-Ionomer Restorative Materials Marketed for Stress-Bearing Areas. D. Fuhrmann, S. Whipple, D. Murchison, K. Vandewalle, Kraig. Abstract 271, 2018 AADR/CADR Annual Meeting
14. Glass hybrid restorations as an alternative for restoring hypomineralized molars in the ART model. J. de Aguiar Grossi, R. Nunes Cabral, A.P. Dias Ribeiro, S. Coelho Leal. BMC Oral Health (2018) 18:65  
<https://doi.org/10.1186/s12903-018-0528-0>
15. Thermo-setting glass ionomer cements promote variable biological responses of human dental pulp stem cells. M. Collado-González, M.R. Pecci-Lloret, C.J. Tomás-Catalá, D. García-Bernal, R.E. Oñate-Sánchez, C. Llena, L. Forner, V. Rosa, F.J. Rodríguez-Lozano. Dent Mater. 2018 Jun;34(6):932-943. doi: 10.1016/j.dental.2018.03.015
16. Viscoelastic Properties of Contemporary Bulk-fill Restoratives: A Dynamic-mechanical Analysis. J. Ong, AU Yap, JY Hong, AH Eweis, NA Yahya. Oper Dent. 2018 May/Jun;43(3):307-314. doi: 10.2341/16-365-L
17. Intrapulpal temperature changes during curing of different bulk-fill restorative materials. E. Yasa, C. Atalayin, G. Karacolak, T. Sari, L.S. Turkun. Dent

- Mater J. 2017 Sep 26;36(5):566-572. doi: 10.4012/dmj.2016-200. Epub 2017 Jun 15
18. Margin Integrity and Secondary Caries of Lined or Non-lined Composite and Glass Hybrid Restorations After Selective Excavation In Vitro. F. Schwendicke, J. Kniess, S. Paris, U. Blunck. Oper Dent. 2017 Mar/Apr;42(2):155-164. doi: 10.2341/16-095-L. Epub 2016 Nov 1.

## Articles in Dental magazines

1. Glass ionomer innovation launched. The Dentist, p.64, July 2015
2. Les CVI à haute viscosité – Partie 2: Application cliniques. E. Dursun, P. François, L. Guillot, M. Martins, J.P. Attal. Bio Matériaux Cliniques. March, 2017, Vol. 2. Pp. 32 – 40
